

FCC:Please DO NOT STOP REGULATING BROADBAND SERVICE. We use a local internet provider (Sonic.net) in northern CA. It is a great service. We want the big phone companies to continue to provide access to all ISPs, including independent ones, like Sonic, which helped build the Internet. We want to be able to continue to use Sonic to get DSL. There is a personal connection, good service & reasonable rates. Please don't let us & others down. Carole Cooper & Gary Blank
